

Programmes designed for you:

Dinamizando el ecosistema **Innovador**
Fostering the **Innovation** Ecosystem

Science + Partners

A showcase that offers companies and investors the opportunity to come into contact with promising research projects with potential for transfer before they are launched. It is a great opportunity to do business.

Open Innovation Forum

An Open Innovation programme that allows you to present your company's innovation challenges and obtain proposals for solutions in a matter of weeks. More than twenty research groups and centres available to you.

Fidelity Programme

Customized programme that allows us to focus our actions on the strategic interests of your company. Its aim is to strengthen the sustained competitiveness of your company through personalized attention, the definition of a roadmap, and periodic monitoring focused on a Partnership Continuum model.

This spirit, the expertise of the FBG, and the research and innovation potential of UB research groups make us your ideal partner to develop world-class innovations with a European and global focus.

Knowledge and Technology Transfer Office of the University of Barcelona

– We are the right research partner for your company

We have **fostered relations between the business sector and the University of Barcelona** for more than thirty years through the promotion and management of the transfer of the knowledge and technology generated at the University.

At the University of Barcelona there are **more than 5,000 experts** who carry out basic and applied research activities. At the FBG we make this knowledge and know-how useful for your company, as **we identify the results and expertise that meet your needs.**

We facilitate the commercial application of our technologies through industrial licenses. These technologies serve as a driving force for our partners, and differentiate them from their competitors.

Innovation offers substantial benefits to your company: saves time in the development of new products and services, reduces costs, provides access to new technologies and increased competitiveness. Our objective is to offer you a complete portfolio of opportunities to advance your business.

We help you to:

1. Contract tailor-made R&D services

– We find your scientific partner for different types of R&D&I projects.

Basic research

Discovery and scientific exploration of new findings TRL1-2

Directed strategic research

Generic results and inventions with great potential for valorisation TRL 2-4

Applied research

Prototype and demonstrator development TRL 3-7

- We identify the research group you need and help them to present a proposal adapted to your needs.
- We deal with the contractual aspects and the economic management of collaborative projects.
- We have 9 research groups accredited by ACCIÓ with the TECNIO certification as developers of the most innovative technologies.
- You can count on the support of the UB brand.

Every year, over 600 companies trust the expertise of the UB in all areas.

2. Apply an innovative technological solution to your business

- Boost your business through patented technologies in a variety of fields of knowledge.
- We have a long experience in the commercialization of technologies generated within the University of Barcelona.

We have a portfolio of more than 120 patents. Exploit a technology and make your business grow.

4. Find funding for collaborative research projects between universities and companies and institutions

- We advise you in the search for funding sources that support innovation projects.
- Profit from tax deductions for companies that invest in R&D&I.

Consult the table of funding options for R&D&I projects carried out with the collaboration of universities.

3. Advance your business with products developed by our innovative spin-offs

- Our spin-offs can offer technological solutions for your business.
- Our spin-offs are an investment opportunity.

Over the last 15 years the FBG has created more than 40 spin-offs.

5. Attract talent

- We identify the scientific-technical skills you need and find the formula to facilitate their incorporation according to your interests.
- Participate in teaching activities.

The competitiveness of your company depends on your staff. At the University of Barcelona we generate today the professional profiles of the future.
